

# On Site Event Communication

The UKWA will be using its Public Address System to make announcements this weekend

However, in addition we will be using a smartphone App. Whilst the PA system works well if you are in proximity, we can now talk to you directly via your smartphone throughout the event.

Not only can we talk to you, if you miss the transmission you can play it back so you never miss a thing.

If you want to be part of this then please search for and download the App called Zello Once you are signed up you go to Channels and search for UKWA including the UKWA logo.

So long as you have the App open at the event you will receive our transmissions
